BARRAWATCH

BRIEFS

Lets keep the lines of communication open, if you haven't already given me your phone number, send up with you next batch of forms

Know someone who didn't get newsletter?

Get them to contact me with their full postal address

Hi Everyone, firstly let me introduce myself, as I'm sure we'll be keeping in close contact over the next couple of years. My name is Danielle Witham, I'm a long term Darwinite, and a science graduate from the NTU. Although only a few weeks into my new position as the research officer for AFANT, I'm thoroughly looking forward to throwing myself into this position, and the prospects of this project in particular. Secondly, for those who are not aware, we have had a big move from Palmerston, and set up our new office at the Malak Shopping Center. The new contact details are on the right hand side of the page. Thirdly, I would like to thank all of

you for your enthusiasm and cooperation in the Billy Taylor BarraWatch Project. All though the database was only installed on the 25th of May, I have made it a priority to enter the data you've collected, so you can see how this information will be used. There have also been a few glitches in the database reporting facility, which has prolonged this newsletter getting to you by a couple of weeks. I'll be in contact over the next couple of weeks, to discuss any concerns or suggestions, until then may your rods be permanently bent.

CATCH STATS

Total caught	714
